

Sustainability Statement

July 2024

BlockW is fully committed to sustainable development and to minimising any negative impacts our work has on the environment. Although we are a small organisation with, for example, a very limited carbon footprint, our mission and our work have many synergies with the U.N. Global Goals for Sustainable Development:

Emerging technologies (and our work to Make Emerging Technologies Inclusive) can have very significant benefits across virtually all of the U.N. Global Goals for Sustainable Development; however, the goals with which BlockW's work connects most directly include the following:

- Goal 4. Quality Education
- Goal 5. Gender Equality
- Goal 8. Decent Work and Economic Growth
- Goal 9. Industry, Innovation and Infrastructure
- Goal 10. Reduced Inequalities
